Typography

Let's be clear our typeface is chosen so that nothing gets in our message. It allows us to be simple, clear, and effective.

We prefer to use different weights or styles, such as bold or light. We use two typefaces mentioned below:

 Acumin Pro (ExtraCondensed Semibold)

 Acumin Pro (ExtraCondensed Black)

Color Scheme

Elegant, sober, distinctive, our palette is as refined as we are. Providing strength and identity. **Sense and Sensibility.**

Use these colors as the main palette. You can also use black or white backgrounds, but do not overuse them.

We do not use other colors.

Variant 5

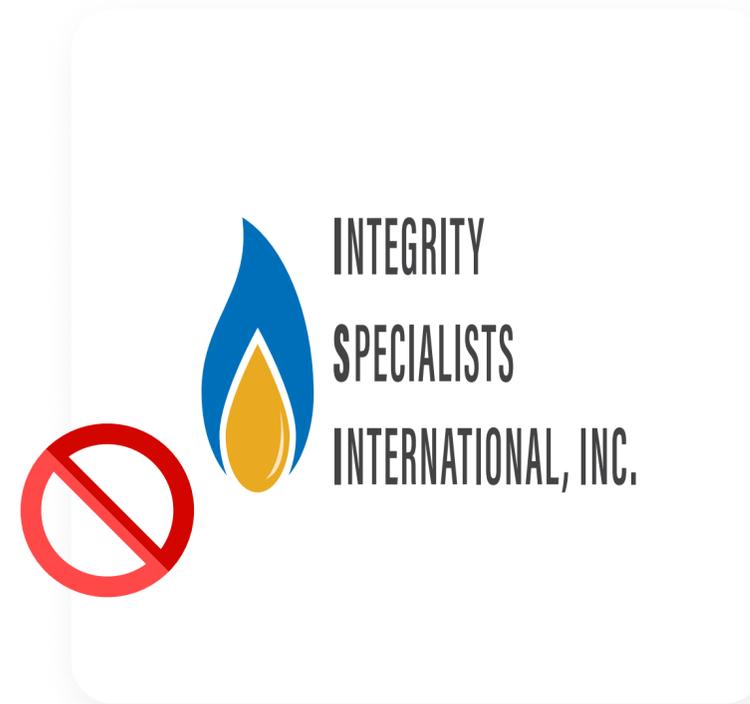

Don't

Don't crop the symbol and don't place it on the edge of your layout.

The symbol can float outside the grid but shouldn't touch the edge.

Don't Skew or transform badly.

Don't change the color of the logo.
